

Product: **Boiling pan - electric** Producer: **Gastro-Haal, s.r.o.**

Purpose

Electric boiling pan is a basic unit in largescale kitchens as a school dining hall, restaurants, hospitals, all types of canteens, including of military, etc. Boiling pan is designed for cooking of soups, sauces, meat, pasta, dairy meals without any danger of burning, for stewing of fish, vegetable, mushrooms, etc. and for heating of frozen meals and semi-finished food.

The food is cooked by steam which is generated in double shell (duplicator).

Features of KE-785-O:

analogy control panel

- volume of cooking tank 85 litres
- manual opening of lid to an angle max.80°
- round cooking tank (indirect heating)
- thermal and protective insulation of duplicator
- probes for measuring the water level in the duplicator
- automatic water filling
- tap for cold water
- safety fitting/valve with manometer
- outlet valve 2"
- outlet tube to valve 2" for bigger pieces of food
- power supply: electricity
- fast heating of cooking tank, low consumption of energy and low operating costs
- quiet, safe, and noiseless operation
- three-stage power regulation of heating elements with 4-position switch
- heating elements in a special steel box
- double insulation on cables and wires (silicone protection)
- self-supporting massive and solid construction
- top plate, inner and outer shell of tank, and lid made of AISI 304
- inner bottom of cooking tank made of high-quality stainless steel AISI 316L
- rounded edges without danger corners and protrusions
- bottom cover of boiling pan
- adjustable feet
- simple operation

Type: **KE-785-O** Country of origin: **SK**

GASTRO - HAAL, s.r.o. IČO: 31435076 Považská 16, 940 67 Nové Zámky +421 35 6 430 115 DIČ: 2020413659 IČ DPH: SK2020413659

Standard accessories of boiling pan:

- sieve in front of outlet valve for catching of food

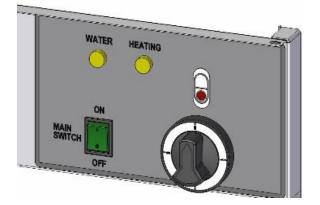

Available accessories for sales price:

- round steamer for dumplings
- food Vaseline for daily maintenance of outlet valve

Front panel

- classic analogy
- 3 position of cooking (1 = ON, 2 = SAVING mode, 3 = FULL mode)

What is the duplicator?

Duplicator is closed steam tank designed for indirect heating of boiling pan cooking tank. The warm is supplied from heating elements to steam, which is produced between duplicator and cooking tank – this is double jacket.

Duplicator is equipped with a safety fitting that protects the equipment from excessive overpressure, ensures that is vented before cooking and the re-aerated at the end of cooking. The safety fitting includes the manometer which controls the pressure in duplicator. The boiling pan includes the pressure switch.

Duplicator therefore ensures the smooth heating, and the food does not burn.

Technical descriptions

Line	700	
Туре	KE-785-O	
Description	electric boiling pan	
Front panel	classic analogy	
External dimensions (mm)	700x700x900 mm	
Volume of cooking tank (I)	851	
Duplicator	round	
Duplicator volume (in intermediate jacket) (l)	39,81	
Water volume in duplicator (after level sensor)	20,81	
Water capacity in duplicator (I)	6,7	
Automatic filling of water into duplicator	yes	
Nominal pressure of duplicator (bar)	0,4	
Heating		
Heating elements in special steel box	yes	
Max.input (kW)	12 kW	
Nominal voltage	3x400/230 V + PEN 50 Hz TN-S	
Nominal current	17A	
Circuit breaker	20 A	
Three-stage power regulation of heating elements with 4-	Lon	
position switch	yes	
Water heating time in a brewing pot 20-90°C (min.)	52 min	
Water, valve, protection		
Cold water connection (")	3/4 "	
Max. water pressure (bar)	6 bar	
Outlet valve (")	2"	
Outlet tube to valve (")	2"	
Index of protection	IP 41	
Construction, savings, safety		
Pressed top plate for water outfall	no	
Double insulation on cables and wires (silicone protection)	yes	
Rounded edges without danger corners and protrusions	yes	
Thermal and protective insulation of duplicator	yes	
Weight (kg)	90 kg	
Covering of bottom	yes	
Options for extra fees according of valid Price list	yes	
Cooking temperature setting (thermostatic control) "T" from 30		
to 100 °C	yes (extra fee)	
Cooking tank material AISI	AISI 316 (tank bottom) standard	
Index of protection IP45	yes (extra fee)	
Vaseline for outlet valve	yes (extra fee)	
Cooking baskets	yes (extra fee)	
Steamers	yes (extra fee)	
Dumplings maker	yes (extra fee)	
Hard water softener	yes (extra fee)	
Sieve in front of outlet valve	free of charge
